

Medhavi Gupta

[9125280756] | medhavigupta234@gmail.com | Kanpur, Uttar Pradesh | Medhavi-gupta-609a1b272

Career Objective

An enthusiastic **Computer Science undergraduate** with academic knowledge in **React, Node.js, Express.js, and MERN stack development**, along with web technologies such as **HTML, CSS, and JavaScript**. Currently enhancing skills through an **ongoing Expense Tracker project**, focusing on applying concepts to real-world scenarios. As a fresher, I am eager to gain **practical industry exposure**, learn from professionals, and contribute to innovative projects while continuously building my technical expertise.

Education

Bachelor of Technology, Computer Science (AIML) (2022 - 2026)
Allenhouse Institute of Technology | (8.52)

Intermediate: Archies Higher Secondary School (2020 - 2021)

HighSchool: Archies Higher Secondary School (2018 - 2019)

Projects

Virtual Try-On (Ongoing Project)

Tech Stack: Python, Computer Vision , OpenCV, Mediapipe , AI/ML , Deep Learning.

- Developing an AI-based application to overlay 2D/3D apparel onto user-uploaded images using Python and OpenCV.
- Implementing Mediapipe for real-time body pose estimation and landmark detection to ensure accurate garment alignment.
- Training a GAN (Generative Adversarial Network) or U-Net architecture to improve fabric texture mapping and realistic draping.

Expense Tracker

Technologies Used: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Developing a **MERN-based web application (React for frontend)** to record, manage, and monitor personal expenses.
- Features include **adding, editing, deleting, and categorizing transactions**, with income and expense tracking in real time.
- Implementing **user authentication and data visualization (chart & dashboards)** for financial insights.
- Designed to help user to **analyse spending patterns, set budgets, and improve financial management**.

Trainings And Certifications

Completed MERN Stack Training organised by Allenhouse Institute of Technology.
Completed Certification in Web Development from Allenhouse Institute of Technology.
Completed Certification in DBMS from Udemy.

Seminars and Workshops

1. Attended International Conference on Applications of Mathematics and Logics in Computer Science organised by Allenhouse Institute of Technology.
2. Attended seminar on How to be AI-powered Engineer by Harjeet Singh, founder of Rabbit AI organised by Allenhouse Institute of Technology.

Technical Skills

Languages: Python, C, JavaScript

Database: PostgreSQL, MySQL, MongoDB

Frameworks: Spring Boot, React.js

Developer Tools: VS Code

Achievements

- Enhanced data structures and algorithm proficiency by solving 100+ problems on LeetCode.
- Bagged 2nd Runner up position in Toycathon Competition organised by Allenhouse Institute of Technology.
